

PARK CREST

Tysons Corner, Virginia

Park Crest, a distinctive multi-phased urban residential community, is set in the heart of Tysons Corner in Northern Virginia.

The first two phases of this development, One Park Crest and Park Crest Lofts, have been completed by LSG and offer residents extensive and inviting outdoor amenities.

Anchoring the site is a park consisting of a great lawn area flanked by a rhythmic patterning of shade trees, lighting and bench seating.

Substantial pergolas of masonry located to the east and west park boundaries extend the adjacent architectural typography out into the public realm. A water feature, stylistically located to present a dynamic arrival sequence to the site, animates the park experience.

LSG was also responsible for extensive site design on the steeply sloped setting, which encompasses a unique shared pool and heavily landscaped terraces.

By sympathetically embracing the singular nature of the site, the landscape of Two Park Crest offers its residents a welcome sense of place.
